

Environmental Policy 2016

Fibercore Limited is committed to a programme of Continuous Environmental Improvement in order to reduce the environmental impact of its operations and activities.

The Company is committed to effective Environmental Management at every level within the organisation and procedures for this are detailed in the Environmental Management System. This meets the requirements set out in ISO 14001:2004 and the certificate number 041660 from the UKAS accredited Sira Certification Service remains current.

Our aims are:

- To comply with all relevant legislation, regulations and other requirements applicable to Fibercore's activities.
- To develop and maintain a comprehensive Environmental Management System, which will foster a culture of commitment to improving Environmental Performance.
- To develop and maintain a proactive attitude to staff training and development, so as to educate and motivate all employees to behave in an environmentally responsible manner.
- To ensure that resource use, including energy and water, is minimised and process waste recycled wherever practicable.
- To prevent pollution from all areas of the company, and to develop and maintain contingency plans where significant environmental hazards exists.
- To demonstrate the company commitment to Environmental responsibility to all interested stakeholders.
- To regularly assess company environmental performance through Management Review.

Fibercore will further commit to achieving the following:

1. Improvements in glass conversion efficiency levels year on year
2. Reducing CO₂ generated from electricity and gas consumption by 10%
3. Reducing water consumption by 10%

Ultimate responsibility for Environmental Management within the Company rests with the Chief Executive Officer who is responsible for all matters relating to environmental aspects.

Chief Executive Officer:
